The Open Bank Project Wins Best Technology Provider For Open API Standards at Global Open Banking Awards

The Open Bank project has been selected as the winner of the first FDATA Open Banking Awards for showing innovation whilst supporting Open Banking Standards, especially digital identity, authentication and API technology.

Berlin (December 13 2018) - The Open Bank Project, the leading open source API solution for banks, has received the award "Best technology provider vending to Open API Standard" at the FDATA Open Banking Awards 2018, held in Edinburgh as part of a two-day global open banking summit on 6th and 7th December 2018. Bringing together key regulators and policy makers from around the world to discuss and debate the delivery of open banking, the inaugural awards have been created to recognise excellence in providing innovative financial applications and services to empower customers to make better decisions and take fuller control of their financial lives.

"Our team has played a pioneering role in the Open Banking movement in Europe, the UK and beyond! This award from The Financial Data and Technology Association, acknowledges the extensive contributions we have made educating the market and informing legislators - and recognizes the expert-backed solutions we are offering our clients and partners." **said Simon Redfern, TESOBE CEO and founder of the Open Bank Project.**

"This is a fantastic line-up of winners for the first FDATA Open Banking Awards showcasing some of the most innovative and forward-thinking organisations operating in the fintech world. FDATA Global is at the forefront of the open banking movement and we're delighted to have launched the Awards to recognise those companies which are excelling in providing innovative solutions to empower consumers through financial services." **added Gavin Littlejohn, FDATA Global Chairman.**

About TESOBE

TESOBE™ is the Berlin-based software company behind the Open Bank Project™, the leading open source API and App store for banks, empowering financial institutions to securely and rapidly enhance their digital offerings. TESOBE assists banks in executing effective API strategies by providing a proven API technology platform supported by an active community of developers and partners. TESOBE consults banks on API strategy, integration, digital transformation and associated regulations as well as running hackathons and other innovation programs for banks.
