

TESOBE / Open Bank Project partners with Nova to deliver banking innovation to Mexico.

Berlin, 13 April 2020. – [TESOBE](#) announces a partnership with [Nova](#) to bring agile, original, secure and sustainable open banking solutions to Mexico.

Through this partnership, Nova will be able to deliver the latest open-source financial technology to banks in Mexico, who will benefit from TESOBE's unrivalled experience in designing, engineering and deploying open APIs. In this way, Nova and TESOBE will deliver Future banking solutions in conjunction with a global community of developers, startups and fintech companies in order to enhance and enrich the customer experience and to prepare for the future.

Rodrigo Gonzalez, CEO of Nova: *"TESOBE will support us in our mission to deliver high-quality innovative solutions to Mexican markets. Our partnership will ensure that financial institutions and fintechs benefit from Open Bank Project's Open Banking APIs and extensive experience in the sector. We are positive that this will be a strong driver for innovation in Mexico and an excellent way for the Open Bank Project to become an Open Banking empowerer in our region."*

Simon Redfern, CEO, TESOBE: *"I'm really happy to deepen our involvement in Mexican open banking and finance through our new partnership with Nova. I was in Mexico City in 2018 and loved my short time there (see <https://www.openbankproject.com/open-banking-mexico-bound>). But in the time of global warming and Coronavirus, it's even more important to reduce travel and work with forward-thinking local partners. We recently provided a remote training for Nova and it went really well. By combining TESOBE's experience and Open Bank Project technology with Nova's future-thinking team, we hope to propel financial innovation and inclusion forward, delivering value to both consumers and financial institutions in the region."*

About Nova Nova is dedicated to providing digital technology outsourcing services based on the design, construction, implementation, integration and support of disruptive technological solutions, specialized in the financial Mexican sector.

About the Open Bank Project: Led by Berlin-based software company [TESOBE](#) GmbH, the Open Bank Project is the leading open-source API solution for banks, ensuring a secure and rapid enhancement of their digital offerings. The Open Bank Project assists banks in the deployment of open banking platforms by providing access to over 300 standardised APIs which are used by our vibrant global community of over 11,000 developers.

Should you have any questions on this press release - or how TESOBE / Open Bank Project can help your bank deploy fintech-friendly APIs, please do get in touch.
